I'm not sure but I think I got this for well under a dollar, probably for a few cents when it was on sale. That said, I'm pretty sure I got ripped off. I mean sure, it's a time management game and I can't expect much but the graphics are lazy, the controls are clunky, and the game play itself is just unenjoyable. This was a punishment, not entertainment.. Nice game graphics are okay but good game.. Nice loco, nice to drive, beautiful to look at.. a steam version of an O3 diesel.. happy owner  
With a few exceptions, I wish I could give this a middle ground review

\*ALL\* Sounds are from the jinty - every single one.. my heart sank when I heard the boiling sound and then the whistle

<https://youtu.be/Vl-Tj2I6U9cs>

[I get that both these engines are fowler type 0-6-0 steamers and the dock tank is probably a mini jinty in real life but a few different sounds wouldnt hurt at all. im going to have to edit the sounds myself.. maybe introduce some pitch differences between the two](#)

[specs wise it is a different engine. cab is different too.. its definately not a copy over I love it.. im happy I got it. but I do wish I got this rather than the jinty because I wouldnt have known any different and loved it all the same](#)

[Not the best result for 13 USD On special and 20 dollars full price lost a little respect for meshtools here.. Sadly steam sounds supreme doesnt have a 2F sound pack.](#)

[as far as im aware theres none left in the wild so that'd be difficult](#)

[I'm giving it a down thumb.. I love it.. others will love it just as much im sure but not if you have the jinty already.. shes a fairly popular engine so... its possible and id like to warn against it](#)

[I stress though I like this engine. Osu veterans will find this way too easy but MUSYNX is perfect for beginner like me. Also DLC songs are not required at all. there are enough songs to practice on before moving to more harder game.. If you are not that easily amused go to options and change the language to something you don't understand \(go for Japanese for aesthetics\). Now that the eyebrow raising attempts at humor are out of the way you are in for the great cerebral ride through the pleasant visuals and novel concepts.](#)

Hi to all of my freinds on "Facebook", "Steam", or any other "games related to the "steam" related network. I have just purchased "GTR" via my "Steam" account, and I have to say to anybody who used to own this game, back in the days of "MV/Soft" XP, that this game has now been upgraded to "WINDOWS 7" COMPATIBILITY. The graphics are a lot better and clearer than the games predessor on the XP version. If anybody still owns the XP version, it will not play on "WINDOWS 7". I have had the original of this game on XP, which has been collecting dust for the last 2yrs due to non compatibility with "WINDOWS 7". The GTR car racing series is a pretty good range of games to buy. On the market at the moment, there is GTR 1, GTR 2, GTR EVOLUTION, GTR LEGENDS or RACE ON, which I believe is now also part of the GTR series of games. I now have the complete range of this series apart from GTR LEGENDS.I can recommend all of these simulation games to the ultimate motor racing fan or anybody who fancies their chances of having a great adrenlin rush and testing their racing skills against the best drivers of these games. Good luck to you all and enjoy yourselves. All the best everybody. (COLIN.D.) ABERDEEN, SCOTLAND, UNITED KINGDOM. I been check my career there nothing download? I be download done try get in nothing in career!. as of time of writing, the game is at version: 0.4.4.1

Simple. Clean. Fun.

this is all you have to really know about this game. no over-elaborate story with multiple plot details that you would have to do some digging, theorizing, looking in the book based off the game to get the idea behind ( at least not yet anyways!). the objective of the game is simple: survive till you can't no more, wether the enemies become far too numrous ( believe me.. getting into the 30 waves by yourself, your facing 50:1 odds and greater.) or your weapons cannot dole out enough damage ( also again, enemies get a lot more health as you get higher up, here in lies the grind. as many see this as a negative, i see this as nessisary to get higher and higher waves.). waves start off simple, 2 enemies on wave 1, and it gets more nad more numerous from there.. 4 on the next, 8 afterwards, and so on and so on. and the boss wave ( every 10th, also your check point for if you want to start off from that wave for higher difficulty) are actually a challenge.. if you don't have unbalancedV over-poweredV over-leveled weapons for that wave. they have multiple ways to get you, and there is no 'camping the corner behind their blind spot till win' way of getting around it. because it will adapt, and change what it does to match WHERE you are.. off the main arena floor? have ALL THE MISSILES!! on the arena floor? less missles, and MORE EARTHQUAKES!!.. it's a challenge to beat bosses on your own without help, but once you get a feel for it, you know how to best take it on, to YOUR style. over all the game still needs work, but that is what early access is about. i will update this review as time goes on, and how development turns this game from a rough cut into a fine polished gem.. The game would be very recommendable... especially for fans of Spencer & Hill.

Unfortunately, for a reason nobody from this planet might ever be able to understand, the developers marred their game with extremely frustrating, technically "meh", unfair mini-games. Which cannot be skipped.

We managed to get until the laser one, which becomes simply impossible as the pseudo-3D doesn't let you see how high your character really are in relation to the lasers you need to go under.

An extreme shame, but with showstoppers like that, I cannot recommend the game to anyone. At least not at normal price.. This mod is fantastic, what's great about is the fact that it's free! And set in the Western Front.

There are only four maps at the moment, but that doesn't stop us from having fun and intense moments in games or mods like this.

The maps look good. My favourite is Oosterbeek, cause the British ^^.  
Custom uniforms aren't to bad, but they look good for a mod.  
The British models and sleeves look great and so does their weapons! ^^.  
(The German G43 looks weird though)

There will be lots of fighting and explosions all around you  
Combat feels like its more deadlier in this mod and more intense.  
Probably because three maps in this game are kinda small, so don't be suprired to experience a lot of dying in the game or maybe it's just me thinking that the maps are small idk.

The big downside is that it uses "Rising Storm" format or whatever, so if you don't have Rising Storm.

You won't be able to use other classes in either side and you'll only be able to use the Rifleman class.

---

But if that doesn't bother you or if you already have RS, go ahead and give this mod a try!. Just completed the first testing facility and want to share some early thoughts.

If you like **Super Meat Boy**, then you are likely to love this one too. These two have many similarities (in a good way), but **Pivot Pilot** adds refreshing unique gameplay elements, as the title suggests. In addition to the player character, you control a robotic arm by rotating each of its three segments. The robotic arm is used to transport the player character to otherwise unreachable places where he can hit switches and such. Levels are finished by navigating the tip of the arm to the goal. Don't be fooled, it is not as easy as it sounds. Concentration is required to pass the puzzles.

The level design is clever and provides a real challenge with equal satisfaction. Sometimes you really need to rush and get that jumping sequence perfectly executed. There is no blaming the controls: you died - your fault.

And speaking of dying, that is going to happen often. Luckily, the soundtrack is so amazing that it will distract you from getting too frustrated. You might as well just hand out the award for the best video game soundtrack of 2017 already. The graphical style is also spot on.

No reason why this game shouldn't be a great hit.. I absolutely love this game. If racing games are your thing, this is one of the best games to buy. The customization is great. The online? Awesome. All for \$10? Completely worth it.
